

Electronic timer CT-SAD.22

Star-delta change-over with 2 n/o contacts

Data sheet

- 20DC 251 100 F0106
- ① Rotary switch for the preselection of the time range
 - ② Potentiometer with direct reading scale for the fine adjustment of the time delay
 - ③ Rotary switch with direct reading scale for the fine adjustment of the transition time
 - ④ U: green LED -

control supply voltage applied timing
 - ⑤ R1: yellow LED -

output relay 1 energized
 - ⑥ R2: yellow LED -

output relay 2 energized
 - ⑦ Circuit diagram
 - ⑧ Function diagram

Features

- Rated control supply voltage 24-48 V DC, 24-240 V AC
- Single-function timer star-delta change-over
- 4 time ranges (0.05 s - 10 min) in one device
- 2 n/o contacts
- 2 LEDs for status indication
- Width of only 17.5 mm
- Light-grey enclosure in RAL 7035

Approvals

	UL 508, CAN/CSA C22.2 No.14	
	GOST	
	CB scheme	pending
	CCC	pending

Marks

	CE	
	C-Tick	pending

Order data

Type	Rated control supply voltage	Time range	Output	Order code
CT-SAD.22	24-48 V DC, 24-240 V AC	0.05 s - 10 min	2 n/o contacts	1SVR 500 210 R0100

Application

With their structural form and their width of 17.5 mm only, the CT-D range timers are ideally suited for installation in distribution cabinets.

Operating mode

The CT-SAD.22 has 2 n/o contacts and offers 4 time ranges, from 0.05 s to 10 min, for the adjustment of the starting time. The time delay range is rotary switch selectable on the front of the unit. The fine adjustment of the time delay is made via a potentiometer, with a direct reading scale, on the front of the unit. The star-delta transition time can also be adjusted in steps of 10 ms within a range of 20-100 ms.

Electronic timer CT-SAD.22

Star-delta change-over with 2 n/o contacts

Data sheet

Function diagram(s)

▲ Star-delta change-over

This function requires continuous control supply voltage for timing.

Applying control supply voltage to terminals **A1-A2**, energizes the star contactor connected to terminals **17-18** and begins the set starting time t_1 . The green LED flashes during timing. When the starting time is complete, the first output contact de-energizes the star contactor.

Now, the transition time t_2 starts. When the transition time is complete, the second output contact energizes the delta contactor connected to terminals **17-28**. The delta contactor remains energized as long as control supply voltage is applied to the unit.
