Thermistor motor protection relays CM-MSS.12 and CM-MSS.13

The thermistor motor protection relays CM-MSS.12 and CM-MSS.13 monitor the winding temperature of motors and protect them from overheating, overload and insufficient cooling.

The devices are available with two different terminal versions. You can choose between the proven screw connection technology (double-chamber cage connection terminals) and the completely tool-free Easy Connect Technology (push-in terminals).

Characteristics

- 1 measuring circuit
- Automatic reset
- Overvoltage protected supply and measuring inputs
- Increased interference immunity acc. to EN 62061 with evaluation criterion "Fail-Safe"
- According to the latest version of the product standard IEC 60947-8
- Screw connection technology or Easy Connect Technology available
- Housing material for highest fire protection classification UL 94 V-0
- Tool-free mounting on DIN rail as well as demounting
- 22.5 mm (0.89 in) width

^{*} Supply and measuring circuits not electrically isolated

Connection technology

Maintenance free Easy Connect Technology with push-in terminals

Type designation CM-xxS.yyP

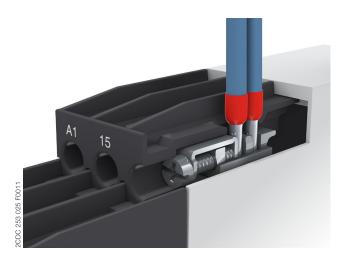

Push-in terminals

- Tool-free connection of rigid and flexible wires with wire end ferrule according to DIN 46228-1-A, DIN 46228-4-E
 - Wire size: 2 x 0.5-1.5 mm², (2 x 20 16 AWG)
- Easy connection of flexible wires without wire end ferrule by opening the terminals
- No retightening necessary
- One operation lever for opening both connection terminals
- For triggering the lever and disconnecting of wires you can use the same tool (Screwdriver according to DIN ISO 2380-1 Form A 0.8 x 4 mm (0.0315 x 0.157 in), DIN ISO 8764-1 PZ1 Ø 4.5 mm (0.177 in))
- Constant spring force on terminal point independent of the applied wire type, wire size or ambient conditions (e. g. vibrations or temperature changes)
- Opening for testing the electrical contacting
- Gas-tight

Approved screw connection technology with double-chamber cage connection terminals

Type designation CM-xxS.yyS

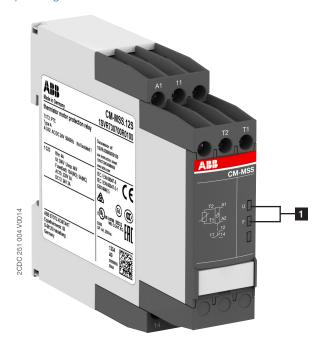

Double-chamber cage connection terminals

- Terminal spaces for different wire sizes: fine-strand with/without wire end ferrule: 1 x 0.5-2.5 mm² (2 x 20 14 AWG), 2 x 0.5-1.5 mm² (2 x 20 16 AWG) rigid:
 - 1 x 0.5-4 mm² (1 x 20 12 AWG), 2 x 0.5-2.5 mm² (2 x 20 - 14 AWG)
- One screw for opening and closing of both cages
- Pozidrive screws for pan- or crosshead screwdrivers according to DIN ISO 2380-1 Form A 0.8 x 4 mm (0.0315 x 0.157 in), DIN ISO 8764-1 PZ1 Ø 4.5 mm (0.177 in)

Both the Easy Connect Technology with push-in terminals and screw connection technology with double-chamber cage connection terminals have the same connection geometry as well as terminal position.

Functions

Operating controls

1 Indication of operational states with LEDs

U: green LED - Status indication of control supply voltage
Control supply voltage applied

F: red LED - Fault message

Application / Monitoring function

The thermistor motor protection relay CM-MSS monitors the winding temperature and thus protects the motor from overheating, overload and insufficient cooling in accordance to the product standard IEC 60947-8, control units for built-in thermal protection (PTC) for rotating electrical machines.

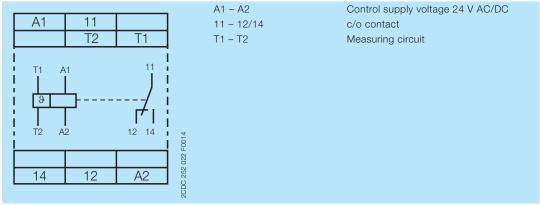

Operating mode

The thermistor motor protection relays CM-MSS.12 and CM-MSS.13 are used to monitor the temperature of motors or generators equipped with PTC resistor sensors type A. The sensors are built-in into the motor windings, measuring the motor heating. In case of an increase of the temperature in the motor, the resistance of the PTC sensors will increase as well. If the motor heats-up excessively (>2.7 k Ω) the output relay de-energizes and the corresponding LED displays the overtemperature. A reset is only possible after cooling down of the motor (<1.2 k Ω).

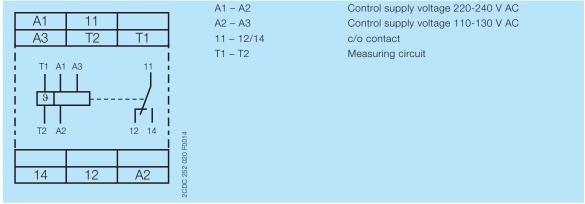

Reset

Once the fault has been rectified and the measured value has dropped below the release threshold, an automatic reset is executed.
