Detailed technical data

Features

Functional principle	Optical detection principle
Dimensions (W x H x D)	10 mm x 80 mm x 110 mm
Housing design (light emission)	Fork shaped
Fork width	50 mm
Fork depth	95 mm
Minimum detectable object (MDO)	0.2 mm
Label detection	✓
Light source	LED, Infrared light
Wave length	850 nm
Adjustment	Teach-in button (Teach-in, sensitivity, light/dark switching, key lock) Cable (Teach-in dynamic)
Teach-in mode	1-point teach-in 2-point teach-in Teach-in dynamic
Output function	Light/darkswitching, selectable via button

Mechanics/electronics

Supply voltage

10 V DC ... 30 V DC $^{\rm 1)}$

 $^{(1)}$ Limit values, reverse-polarity protected, operation in short-circuit protected network: max. 8 A.

 $^{2)}\,\text{May}$ not exceed or fall below U_{V} tolerances.

³⁾ Without load.

⁴⁾ With light/dark ratio 1:1.

 $^{5)}\,\mathrm{Signal}$ transit time with resistive load.

⁶⁾ Reference voltage DC 50 V.

⁷⁾ Depending on fork width.

⁵⁾ Signal transit time with resistive load.

⁶⁾ Reference voltage DC 50 V.

 $^{7)}$ Depending on fork width.

Communication interface

Communication interface	IO-Link
Cycle time	2.3 ms
Process data length	16 Bit
Process data structure A	Bit 0 = switching signal Q_{L1} Bit 1 = switching signal Q_{L2} Bit 2 = not used Bit 3 = Teach busy Bit 4 15 = empty
Process data structure B	Bit 0 = switching signal Q_{L1} Bit 1 = Quality of Run Alarm Bit 2 = not used Bit 3 = Teach busy Bit 4 15 = empty
Process data structure C	Bit 0 = switching signal Q_{L1} Bit 1 = switching signal Q_{L2} Bit 2 = not used Bit 3 = Teach busy

FORK SENSORS

	Bit 4 5 = empty Bit 6 15 = measuring value
Process data structure D	Bit 0 = switching signal Q_{L1} Bit 1 = Quality of Run Alarm Bit 2 = not used Bit 3 = Teach busy Bit 4 5 = empty Bit 6 15 = measuring value
VendorID	26
DeviceID HEX	8000AE
DeviceID DEC	8388782

Ambient data

Ambient operating temperature	-20 °C +60 °C ¹⁾
Ambient storage temperature	-30 °C +80 °C
Ambient light immunity	≤ 10,000 lx
Shock load	According to EN 60068-2-27
UL File No.	NRKH.E191603

 $^{1)}$ Do not bend below 0 $\,^{\circ}\text{C}.$

Adjustments

Adjustment: teach-in via Teach-in button (WFxx-B41Cxx)

- 1 Function signal indicator (yellow), switching output
- ② Function signal indicator (green)
- ③ Teach-in button and function button

Connection diagram

Cd-273

FORK SENSORS

Concept of operation

Teach-in via Teach-in button (WFxx-B41Cxx)

1. Start teach-in: Position the background or object between the fork

Press the teach-in button for 3 - 20 s. With the pushbutton pressed down, move several objects with carrier material (label objects to be detected) through the sensor. The yellow LED flashes at 3 Hz during the teach-in procedure. Recommendation: Move at least 3 objects through the sensor.

Note

Fine adjustment

In order to obtain a higher operating reserve, a fine adjustment can be carried out after successful teach-in. For this purpose, the switching threshold is set close to the taught-in object. The teach-in button must be pressed and released within 10 s of successful teach-in. Successful setting is signaled by flashing twice at 1 Hz.

Light/dark switching

 \bigcirc

()

You can change between light switching and dark switching by pressing the teach-in button for 20 - 30 s.

Pushbutton lock

The device can be locked against unintended operation by pressing the teach-in button for > 30 s. The device can be unlocked by pressing the teach-in button again for > 30 s.

Recommended accessories

	Brief description	Туре	Part no.
Modules and	gateways		
	IO-Link version V1.1, Port class 2, PIN 2, 4, 5 galvanically connected, Supply voltage 18 V DC 32 V DC (limit values, operation in short-circuit protected network max. 8 A)	IOLP2ZZ-M3201 (SICK Memory Stick)	1064290

2. End teach-in:

Release the teach-in button for < 20 s. If teach-in is suc-cessful, the function indicator (yellow LED) directly indicates the output state of the sensor. The switching threshold is now optimally set between background and object. The best possible operational safety is provided.

Function Block Factory		
• Description: The Function Block Factory supports common programmable logic controllers (PLCs) from various manufacturers, such as Siemens, Beckhoff, Rockwell Automation and B&R. More information on the FBF can be found here .	Function Block Factory	On request

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is "Sensor Intelligence."
