

## On-off/soft-start valves MS-EM/EE/DL/DE, MS series

FESTO

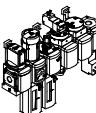

★ /★	Festo core product range Covers 80% of your automation tasks	★ Ready for dispatch from the Festo factory in 24 hours Held in stock in 13 service centres worldwide More than 2200 products
Worldwide:	Always in stock	★ Ready for dispatch in 5 days maximum from stock Assembled for you in 4 service centres worldwide
Superb:	Festo quality at an attractive price	Up to $6 \times 10^{12}$ variants per product series
Easy:	Reduces procurement and storing complexity	 Look for the star!

## Function

- - Flow rate  
1,200 ... 8,700 l/min
- - Temperature range  
-10 ... +60 °C
- - Operating pressure  
0 ... 18 bar

- Manually operated on-off valve for pressurising and venting pneumatic installations
- The valve is activated by turning the rotary knob

- At connection 3 there is the facility to attach a silencer and/or to duct the exhaust air

- When the valve is closed, the rotary knob can be secured with a padlock

- Optional pressure gauge
- Optional pressure sensor
- Optional device variant EX4 for use in potentially explosive areas in zones 1, 2, 21 and 22

- - Flow rate  
1,000 ... 7,000 l/min
- - Temperature range  
-10 ... +60 °C
- - Operating pressure  
4 ... 18 bar

- Solenoid actuated on-off valve for pressurising and venting pneumatic installations
- With solenoid coil without plug socket
- Three voltage ranges can be selected
- Ducted exhaust possible via a threaded connection with silencer
- Non-detenting and detenting manual override (variant 10V24: only non-detenting)
- Solenoid actuator can be repositioned by 180°
- Optional pressure sensor
- Optional device variant EX2 for use in potentially explosive areas in zones 2 and 22

## Function

- - Flow rate  
1,000 ... 6,450 l/min
- - Temperature range  
-10 ... +60 °C
- - Operating pressure  
4 ... 18 bar

The duration of the pressure build-up is adjusted using the restrictor attached to the valve cap. The output pressure  $p_2$  rises slowly in accordance with the restrictor setting. The main seat opens when the switch-through pressure is reached.

- Pneumatically actuated soft-start valve for slowly pressurising and venting pneumatic installations (for use with on-off valves EM1 and EE)
- The drives advance slowly and reliably into the initial position
- Sudden and erratic movements are avoided
- Pressure switching approx. 50% of operating pressure
- Adjustable switching time delay
- Optional pressure sensor
- Optional device variant EX4 for use in potentially explosive areas in zones 1, 2, 21 and 22

## Function

- Flow rate  
1,000 ... 6,450 l/min
- Temperature range  
-10 ... +60 °C
- Operating pressure  
4 ... 18 bar

The duration of the pressure build-up is adjusted using the restrictor attached to the valve cap. The output pressure  $p_2$  rises slowly in accordance with the restrictor setting. Only the air flow from the restrictor is available when the solenoid valve is not actuated. The main seat is only opened by energising the solenoid valve.

When the solenoid valve is switched off, the main seat is closed and only the air flow from the flow control valve is available. The solenoid valve should remain switched on in order to vent a system as this increases the flow rate from 2 and 1 and reduces the exhaust time.

- Solenoid actuated soft-start valve for slowly pressurising and venting pneumatic installations
- The drives advance slowly and reliably into the initial position
- Sudden and erratic movements are avoided
- With solenoid coil without plug socket
- Switch-through pressure can be precisely controlled using a solenoid valve
- Adjustable switching time delay
- Three voltage ranges can be selected
- Non-detenting and detenting manual override (variant 10V24: only non-detenting)
- Solenoid actuator can be repositioned by 180°
- Optional pressure sensor
- Optional device variant EX2 for use in potentially explosive areas in zones 2 and 22

1) The screws for the wall bracket on the reverse side are partially covered by the housing of this service unit. Depending on the configuration of the service unit combination, the screws will no longer be accessible. The mounting bracket MS9-WPM is therefore recommended for wall mounting. It can be used to attach a fully assembled combination to the pre-mounted wall bracket.

- - Temperature range  
-10 ... +60 °C
- - Operating pressure  
0 ... 20 bar

3/2-way valve, double solenoid

- Manually operated on-off valve for pressurising and venting pneumatic installations
- Ducted exhaust possible via a threaded connection with silencer

- The switching position is immediately recognisable
- Actuator secured by locking the rotary knob

- Commercially available padlock can be used for security
- Optional pressure gauge

- Optional device variant EX4 for use in potentially explosive areas in zones 1, 2, 21 and 22

1) The screws for the wall bracket on the reverse side are partially covered by the housing of this service unit. Depending on the configuration of the service unit combination, the screws will no longer be accessible. The mounting bracket MS9-WPM is therefore recommended for wall mounting. It can be used to attach a fully assembled combination to the pre-mounted wall bracket.

## Function

- - Flow rate  
25,000 ... 32,000 l/min
- - Temperature range  
-10 ... +50 °C
- - Operating pressure  
3 ... 16 bar

- Solenoid actuated on-off valve for pressurising and venting pneumatic installations
- With solenoid coil without plug socket
- Three voltage ranges can be selected
- Ducted exhaust possible via a threaded connection with silencer
- Non-detenting and detenting manual override

## Function

- - Flow rate  
25,000 ... 42,000 l/min
- - Temperature range  
-10 ... +60 °C
- - Operating pressure  
2 ... 20 bar

The duration of the pressure build-up is adjusted using the restrictor attached to the valve cap.

The output pressure p<sub>2</sub> rises slowly in accordance with the restrictor setting. The main seat opens when the switch-through pressure is reached.

- Pneumatically actuated soft-start valve for slowly pressurising and venting pneumatic installations (for use with on-off valves EM and EE)
- The drives advance slowly and reliably into the initial position

- Sudden and erratic movements are avoided
- Pressure switching approx. 50% of operating pressure
- Adjustable switching time delay

## Function

- Flow rate  
25,000 ... 42,000 l/min
- Temperature range

- Operating pressure  
3 ... 16 bar

The duration of the pressure build-up is adjusted using the restrictor attached to the valve cap. The output pressure  $p_2$  rises slowly in accordance with the restrictor setting. Only the air flow from the restrictor is available when the solenoid valve is not actuated. The main seat is only opened by energising the solenoid valve.

When the solenoid valve is switched off, the main seat is closed and only the air flow from the flow control valve is available. The solenoid valve should remain switched on in order to vent a system as this increases the flow rate from 2 and 1 and reduces the exhaust time.

- Solenoid actuated soft-start valve for slowly pressurising and venting pneumatic installations
- The drives advance slowly and reliably into the initial position
- Sudden and erratic movements are avoided

- With solenoid coil without plug socket
- Switch-through pressure can be exactly controlled using a solenoid valve
- Adjustable switching time delay
- Three voltage ranges can be selected
- Non-detenting and detenting manual override
