Converter losses to IEC61800-9-2*			
Efficiency class	IE2		
Comparison with the reference converter (90% / 100%)	33.64 %		

The percentage values show the losses in relation to the rated apparent power of the converter.

The diagram shows the losses for the points (as per standard IEC61800-9-2) of the relative torque generating current (I) over the relative motor stator frequency(f). The values are valid for the basic version of the converter without options/components.
